SECTION III

Report on Curricular Terminology

On February 24, 1983, the Faculty Senate voted to refer proposed new sections 8.20.50 and 8.20.60 which had appeared in the 196th Report of the CAC to the Curricular Affairs Committee with instructions to clarify the recommendations and report back to the Faculty Senate. At the Curricular Affairs Committee's meeting of March 7, the proposed sections were reviewed and it was agreed that the term "minor" should be clarified as follows: a "minor" is essentially the same as the former term "area of interest;" a "minor" may or may not complement a "major."

The Curricular Affairs Committee recommends approval of the following new section of the University Manual:

8.20.50 Major Fields of Study. An undergraduate student's concentrated field of study in a degree-granting college shall be the student's "major"; University College students may have a "preferred major." The major field of study for graduate students shall be the student's "program." An "option" is a recognized path toward a major. Curricular requirements for majors and programs are defined in the University Bulletins. A student's major(s) or program(s) will be listed on the student's permanent academic record after graduation.

8.20.60 Minor Fields of Study. Undergraduate students may declare a "minor" field of study. Requirements for a minor may be satisfied by 1) completion of eighteen or more credits offered within a department and approval of the department chairperson, or 2) completion of eighteen or more credits of related studies offered by more than one department and approved by a member of the faculty competent in the minor area of study and the dean of the college. A student's approved minor(s) will be listed on the student's permanent academic record after graduation.
